Types of Workflow

Workflows are assigned when you create NEW or AMEND existing curriculum and will be selected based on the type of curriculum, the academic organisation the curriculum is owned by and the action to be performed.

New (Class Summary, Course, Program, Major, Minor or Specialisation)

- Creates new curriculum and follows the formal governance process for approval.

Amend (Course, Program, Major, Minor, Specialisation or Honours Specialisation(Admission Requirements Only)

- Allows changes to be made to existing curriculum and depending upon the scope of changes allows approvals to be streamlined or follow formal governance processes.

Disestablish (Course, Program, Major, Minor or Specialisation)

- Allows justifications to be submitted to the governance authorities to disestablish the curriculum.

Made a mistake?

What if I need to make more changes and I no longer have permission to edit the curriculum?

- Each workflow has the ability to return to a draft state for more editing "Pending feedback resolution". Contact your College Governance office for assistance.

What if I chose the wrong workflow?

- ASQO have access to an CMS *Override* feature and can correct workflow selection errors.

Workflow "happy path", Changing State and Workflow History

The Workflow button supports – *Change State* shows available states that the curriculum can be transitioned to; *History* shows all previous state changes and activities for the curriculum item; and *Workflow Panel* shows available "happy path" flow for the curriculum workflow.

Override - ASQO can correct workflow mistakes (inactive for all other users)
