SERVICE GUIDE

## about us

Airbike is the first Australian owned and operated dockless bike-sharing platform. We want to revolutionise the way people move by providing a convenient and affordable form of transportation that doesn't cost the Earth.

Our patented technology and smartphone app provides the last mile of inner-city transport when you need it most. From where you are, to where you want to be, Airbike wants to help you reimagine the way you navigate your city.

A woman with long brown hair, wearing a black jacket, is seen in profile from the waist up, looking out over a large body of water. The sky is a mix of light blue and orange, suggesting sunset or sunrise. In the foreground, two white bicycles are parked on a concrete ledge. The bicycles have black seats, handlebars, and fenders. One of the bicycles has a black helmet hanging from its handlebars. The background shows a line of trees with some autumn-colored foliage and a distant shoreline.

# how it works

Getting started with Airbike is easy. Download the Airbike app for Android or iOS and register as a new user.

**01**

**Find**

Find a nearby bike based on your location.

**02**

**Scan**

Scan the QR code to unlock your bike.

**03**

**Lock**

Lock your bike & helmet to finalise your trip.

A white bicycle is parked on a grassy area. A black helmet with the 'ob' logo is mounted on the handlebars. The bicycle has 'ob' branding on the frame. In the background, a large, highly reflective sphere (the 'The Sphere' sculpture) is visible, reflecting the surrounding environment. To the left, a modern building with a distinctive facade of white, angular, protruding balconies is visible. The sky is clear and blue.

## travel at your own speed

- Dockless
- Puncture-free tyres
- Phone holder
- Front and back wheel brakes
- Solar-powered 3G GPS lock
- Geared bikes
- Aluminum frame
- \$1.30 per 30 minutes
- Pre-pay or pay-as-you-ride

## our team

**Airbike is a university start-up, spearheaded by students who want a better way to live.**

We partner with universities to foster micro-cities that improve campus life. By working directly with universities and local communities, Airbike aims to give students and staff a healthy, eco-friendly way to get around without the disorganisation and public disruption that has occurred with share-bikes in some cities.
